## **DETAILED ACTION**

### ***Specification***

A substitute specification with the claims is required pursuant to 37 CFR 1.125(a) because the facsimile is illegible for printing.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is indefinite. As understood, the claim is believed to be reciting a subcombination of the combination claim 1.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3743

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gardner.

Claims 1-2 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vollhardt.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner or Vollhardt in view of Kessler.

Gardner or Vollhardt discloses all the claimed limitations except detachable plugs.

Kessler discloses a heat exchanger (Figures 5-7) comprising supply and discharge channels 33 connected a plurality of tube bores 31, and detachable plugs 32 for the purpose of ease of maintenance and assembly.

Since Gardner or Vollhardt and Kessler are both from the same field of endeavor and/or analogous art, the purpose disclosed by Kessler would have been recognized in the pertinent art of Gardner or Vollhardt.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Gardner or Vollhardt detachable plugs for the purpose of ease of maintenance and assembly as recognized by Kessler.

Art Unit: 3743

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
